**Sunshine Solar, LLC Certified By the Women's Business Enterprise
National Council**

Marietta, Georgia—9/24/2020—Sunshine Solar, LLC, a business specializing in Mechanical Solar Installation, is proud to announce national certification as a Women's Business Enterprise by the Greater Woman's Business Council, a regional certifying partner of the Women's Business Enterprise National Council (WBENC). Sunshine Solar was co-founded in 2016 by Emilie O'Leary, and she helms the business with her partner and majority owner Kristina Newby.

"So few solar businesses today are owned by women, especially Commercial solar installers," O'Leary said. "We celebrate this WBENC Certification as a recognition of all the hard work Kristina and I have put into growing this business and establishing ourselves as one of the fastest-growing solar installers in the country."

"Clients today are more informed and want to make responsible decisions about where to take their business," said Newby. "The WBENC certification lets them know that we don't just have a high standard of excellence in all our work—we are also a recognized women-owned company."

WBENC's national standard of certification implemented by the Greater Woman's Business Council is a meticulous process including an in-depth review of the business and site inspection. The certification process is designed to confirm the business is at least 51% owned, operated and controlled by a woman or women.

By including women-owned businesses among their suppliers, corporations and government agencies demonstrate their commitment to fostering diversity and the continued development of their supplier diversity programs.
